Tools & Ecosystem: Git, Vite, Webpack, ESLint, Figma, Postman

Testing: Jest, React Testing Library

Deployment & DevOps: Vercel, Netlify, Docker, GitHub Actions

About Me

Frontend developer with 2+ years of commercial experience building modern web applications. Quick at understanding existing codebases and architectures, and can propose practical solutions without breaking structure. Focused on interface quality, UI consistency, and reliability. Work well in a team, easily adapt to new technologies and development workflows.

Work Experience

Aug 2023 — Sep 2025

Frontend Engineer

EPAM Systems

Context: Development of internal web tools for analytics, process management, and employee interaction. Worked with large data volumes, custom roles, real-time updates, and graph visualizations.

Responsibilities:

- Developed visualization modules for displaying relationships between users and data (React + Cytoscape.js)
- Optimized rendering of complex components and improved UI responsiveness
- Added SSR and code splitting to speed up page loading
- Contributed to a shared design system and internal UI component library
- Integrated data via REST and GraphQL APIs, configured real-time updates
- Fixed visual bugs and refined UI behavior for consistent component interaction

Stack: React, Next.js, Redux, TypeScript, Cytoscape.js, GraphQL, SCSS, Jira, Figma, Git

Additional Information

Languages: Russian (native), English (B2)

Education: Bachelor's degree, Computer Science (in progress)

Interests: UI engineering, component architecture, React app structure, UX animations
